

Just an idea...

Posted by GoYankees - 2010/01/11 15:50

i read somewhere virtualbox OSE doesnt have usb support, but VirtualBox does.if this is true and i copy the VirtualBox usb driver .sys file and replace the original does it give VMLite USB support?

It might be possible, but very tricky, need to replace some dlls and drivers, that will violate the licese, so be a bit patience, we will support USB. We are heavily working on it. VBoot already supports booting XP from a single file in a USB, so the core USB code is working.
